SUMMARY

Backend software engineer with 5 years of experience building scalable web services. Responsible for designing REST APIs and data pipelines. Reduced service latency by 40% and cut infrastructure costs by 25,000 dollars annually.

EXPERIENCE

Senior Software Engineer, Acme Corporation — 2021 to Present

- Built and deployed microservices in Python using FastAPI and Docker.
- Designed PostgreSQL schemas and optimized SQL queries for 2 million users.
- Deployed services to AWS using Kubernetes and Terraform.
- Led a team of 4 engineers and mentored 2 junior developers.

Software Engineer, Globex Inc — 2018 to 2021

- Developed data pipelines with Apache Spark and Kafka.
- Built machine learning models with scikit-learn and TensorFlow.
- Created dashboards in React and TypeScript.

EDUCATION

B.S. in Computer Science, Stanford University — 2018

SKILLS

Python, Java, SQL, FastAPI, Docker, Kubernetes, AWS, PostgreSQL, React, TensorFlow, communication, leadership, problem solving.
